## Partners in your business

Chartered accountants are perceived as processors rather than innovators but we like to think of ourselves as trusted advisers with an entrepreneurial flair.

As a client, you need your “accountant” to offer you assurance, inspiration and guidance to help you fulfil your business goals. Which is why, at SG, we would become involved with your business as though it were our own, encouraging and advising on the formulation of your strategy and helping you to implement your plans.

We are here to advise you on maximising profits and wealth creation, in line with your personal aspirations.

We will listen carefully to you, try and understand your needs and seek to combine our professional and entrepreneurial skills in formulating our responses.

Our watchful and experienced eye will be at work, allowing you to concentrate on what you do best..... running your business.

The range of services we offer is tailored to the needs of individuals and businesses seeking financial success and security.

## Tax Mitigation and Compliance

Many businesses and individuals pay far too much tax by failing to plan effectively. Tax planning is much more than cutting the tax bill. There are many pitfalls, so what may save one type of tax could possibly trigger another tax problem.

We take the time and trouble to understand how your business works and indeed fits into your family life and plans. We then try and take advantage of relevant tax legislation to avoid taxation problems.

We can help in mitigating Income Tax, Capital Gains Tax, Inheritance Tax, Corporation Tax and Stamp Duty.

We can assist with remuneration planning by advising on tax effective solutions.

We can deal with all aspects of tax compliance in a timely and cost effective manner.

## Strategic and Financial Planning

We like to think of ourselves as business people first and accountants next. We are very happy to be involved with you to assist you in running your business, to whatever level of expertise is required. We have many years experience in advising businesses across a wide range of activities and are therefore very comfortable in being your business advisers.

We can also undertake a financial risk assessment of your business, which would help you to control and manage your business effectively.

## Accounts and Audit

We have the resources and capabilities to deal with your annual accounts, whether they require an audit or not. Our IT systems help to produce accounts cost effectively.

## Corporate Finance and Business Consultancy

We can help you evaluate where your business is going and advise on delivering long term stability and growth to you and your business. We can also advise on exit strategy.

We advise on management buyouts, management buyins, mergers and acquisitions, joint ventures etc providing a comprehensive service working with lawyers and bankers. We have a wide network of legal and banking contacts.

Using our varied network of contacts, we can assist you in raising finance whether it be a short term or long term, equity or debt.

We can prepare business plans, cashflow and profit forecasts etc.

We try and offer creative and realistic solutions with practical help for their implementation.

## Inward and Outward Investment

We have particular expertise in looking after the needs of overseas companies and individuals setting up in the UK. We also have some experience of UK companies and individuals investing overseas.

We can advise on international tax including transfer pricing, minimising withholding tax and double taxation relief.

We regularly assist our overseas clients in obtaining various types of grants in the UK.

We are also able to advise inward investors on business opportunities and trends in the UK.

**Whatever you need,  
we offer a one-stop-shop**
